

## Evaluation Approach Paper

# An Evaluation of ADB's Support for Education in Asia and the Pacific

March 2024

Team Leaders: Erik Bloom, Principal Evaluation Specialist ([ebloom@adb.org](mailto:ebloom@adb.org));  
Ari Perdana, Senior Evaluation Specialist ([aperdana@adb.org](mailto:aperdana@adb.org))

Contact: [evaluation@adb.org](mailto:evaluation@adb.org)

---

## A. Introduction

1. This paper sets out the approach, and methodology for an independent evaluation of Asian Development Bank's (ADB) support for education in Asia and the Pacific.<sup>1</sup> The evaluation will assess ADB's contribution to education as a tool for poverty reduction and promoting inclusive growth. The evaluation will provide lessons and recommendations to improve ADB's approach and operations in support of education.

2. The Independent Evaluation Department's (IED) work in the education sector has been limited. In addition to two project-level evaluations, IED conducted its last comprehensive review of the sector in 2008, producing a sector synthesis report.<sup>2</sup> In the ensuing period, ADB has prepared three education-related strategy or policy documents—the education sector study (2008), education sector operational plan (2010), and education sector directional guide (2022).<sup>3</sup> However, the economic and development context has changed significantly since 2008. Demographic changes, globalization, and the growing importance of knowledge in the economy (“the knowledge economy”) have led to major changes in the demand for education. The recent coronavirus disease (COVID-19) pandemic has adversely affected learning outcomes, particularly in basic education. These changes in the landscape require governments and development partners like ADB to rethink their approach to education. In its Strategy 2030, ADB will continue to increase its support to social sectors, including education. Given the importance of the education sector, IED included an education evaluation in its work program.<sup>4</sup>

### 1. Education is a Vital Ingredient for Development

3. Education and learning play a central role in development. While investing in physical capital can provide the tools to raise an economy's income, education is the central catalyst for sustainable development. Countries need to invest in human capital to sustain economic growth and to achieve shared prosperity. The transition from a natural resources-based economy to an industrial economy and ultimately to a knowledge economy is largely driven by investments in education at various levels—innovation and research from universities combined with improved basic education and specialized technical education for farmers and workers play a central role in high-quality economic growth.

---

<sup>1</sup> The evaluation was included in the 2023–2025 IED Work Program for presentation in 2024. The IED team met with the members of the Board of Directors in November and December 2023 to discuss the proposed evaluation.

<sup>2</sup> IED. 2008. [Sector Synthesis of Evaluation Findings: Education Sector](#). Manila: ADB. IED has also conducted an evaluation on the [Education Sector in Bangladesh: What Worked Well and Why under the Sector-Wide Approach?](#) in 2008 and [Education Sector Assistance Program Evaluation for Uzbekistan](#) in 2010.

<sup>4</sup> ADB. 2023. [Independent Evaluation Department Work Program](#), 2024–2026. Manila.

4. Above and beyond its economic benefits, education brings clear social benefits. Numerous studies have shown education's value in improving health outcomes for both adults and children. Likewise, education is associated with greater social cohesion, reduced violence, as well as improved status for women and vulnerable groups. Finally, education itself is a human right and a major component of the Sustainable Development Goals.

## 2. Despite Gains, there Remain Significant Education Challenges

5. Asia and the Pacific have made considerable progress improving access to education. Primary enrollment is near universal, while secondary enrollment has improved significantly in many developing member countries (DMCs). Some DMCs, such as the Philippines and Thailand, have made the shift to mass enrollment at the tertiary level, following the pattern of high-income countries. As shown in Figure 1, since 1950, the average number of years of education of the population has improved substantially in many DMCs. Women and girls have seen particularly large increases in their participation in education as well as their levels of education attainment, and the gender gap has narrowed in most DMCs at most levels.

**Figure 1: Educational Attainment in Asia and The Pacific has Increased Substantially**

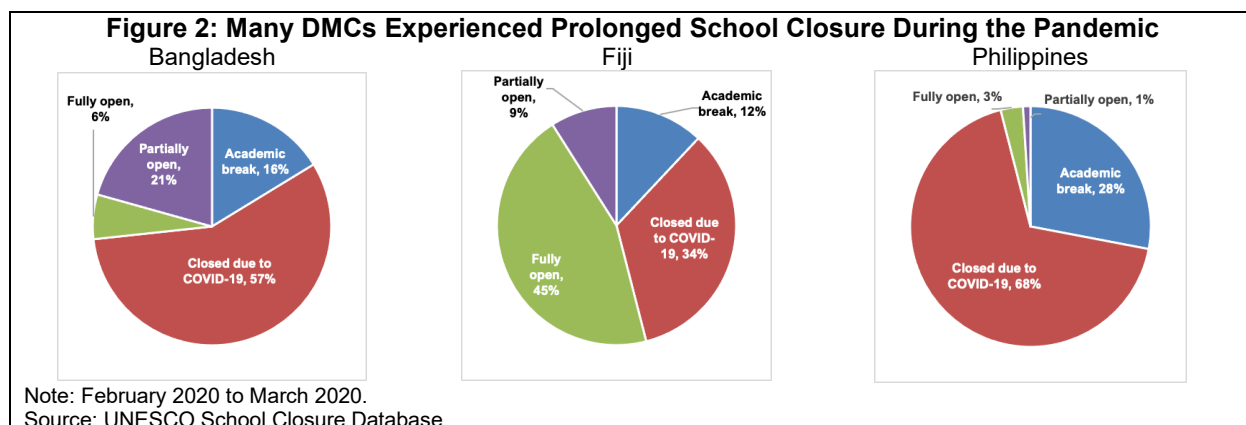

Source: Wittgenstein Centre. Human Capital Data Explorer.

6. However, the region continues to face many challenges in the education sector. First, there remain barriers to entry. At lower levels of education, children in remote areas or slums may not have access to schools. Gender barriers still exist in some DMCs as do barriers to participation for children with disabilities, ethnic minorities, and displaced persons. Likewise, economic barriers are significant in many countries, particularly at the secondary and tertiary levels.

7. Second, in many instances, improvements in access have not yet translated into improvements in the quality of education and associated learning outcomes. Although students in Asia's developing countries (such as Singapore and Republic of Korea) have outperformed their peers in Europe and North America, the mathematics, reading, and science scores of most ADB DMCs participating in the Program for International Student Assessment (PISA)—Viet Nam being an exception—are in the bottom quintiles.<sup>5</sup> The region is facing significant levels of “learning poverty”, which is the share of children who are unable to read and understand a simple text by age 10. Prior to the COVID-19 pandemic, learning poverty was 59.8% in South Asia and 34.5% in East Asia and the Pacific. During the COVID-19 pandemic, many schools in Asia and the Pacific were closed for long periods (Figure 2). School closures have exacerbated learning losses that have worsened learning poverty to almost 80% in South Asia and 45% in East Asia and the Pacific.<sup>6</sup>

<sup>5</sup> Organization for Economic Cooperation and Development. 2022. [PISA 2022 results](#) (accessed 10 January 2024).

<sup>6</sup> World Bank, UNICEF, FCDO, USAID, and Bill and Melinda Gates Foundation. 2022. *The State of Global Learning Poverty: 2022 Update*.

8. Third, there is a significant mismatch between the demand for skills in the labor market and what is produced by education systems in general, and tertiary education in particular. Prior to the pandemic, unemployment rates among 20–24 years old with an advanced degree was 19% in Indonesia, 46% in India, and 16% in the Philippines and Viet Nam.<sup>7</sup> Meanwhile, the rate of unfilled vacancies in the region is higher than the global average.<sup>8</sup> This suggests that the region's higher education institutions do not produce skilled knowledge workers of sufficient quality.

### 3. Increasing Complexity in the Economy will Affect the Demand for Education

9. Inclusive, quality education systems are crucial for sustainable economic growth. As economies evolve and grow in complexity, e.g., evolving towards knowledge-based industries, embracing technological advancements, as well as becoming globally interconnected, the skills required by the workforce become more sophisticated. Consequently, the demand for higher quality education at all levels will need to increase. This phenomenon is well-explored in the literature since Schultz (1962) and Becker (1964) began to study the economic role of human capital.<sup>9</sup> However, if only a small share of the population has access to quality education, inequality will widen. As such, investing in the quality of education at all levels becomes not only an individual pursuit for personal development but it also becomes a collective imperative for fostering poverty reduction, inclusivity, and economic prosperity.<sup>10</sup>

10. The region is also facing challenges associated with: (i) climate change, (ii) demographic shifts, (iii) urbanization, (iv) greater labor mobility, and (v) digital transformation.<sup>11</sup> These trends will have important implications for education systems and learning outcomes. Such trends will also affect the types of skills required of graduates from education systems and, as such, will influence curricula, how teachers are trained, and how education is delivered.

## **B. ADB's Strategy and Portfolio in the Education Sector**

### **1. ADB's approach to the education is evolving**

11. ADB operations in education are guided by both ADB-wide policy and strategy documents as well as individual country partnership strategies (CPSs). The Board of Directors approved an education sector policy paper in 2002, which to now remains active.<sup>12</sup> The policy paper views education as a prerequisite for both economic and human development and comments that the quality of education provided at all levels remains unacceptably low in many DMCs.

12. ADB Management has since issued an education sector study (2008), education sector operational plan (2010), and education sector directional guide (2022).<sup>13</sup> These documents provide strategic focus and guidance for ADB support in education overall noting that the type and intensity of support varies from country to country as guided by the relative emphasis placed on education in CPSs. ADB's latest vision for education, which is outlined in the 2022 sector directional guide, is "to achieve quality-assured, inclusive education system that ensures learning for all." It identifies two key challenges faced by most DMCs—learning deficits and skills mismatch—and suggests that ADB needs to adopt a more strategic, longer-term modality of engagement with the sector if these challenges are to be addressed successfully. Compared to the previous strategy documents, the 2022 sector directional guide contains ADB's ambitions to play a catalytic role in promoting innovation and adopting a transformative approach in education. It envisions future ADB support to: (i) take an ecosystem approach to education technology; (ii) ensure teacher readiness in digital learning; (iii) integrate systems of learning management and resource planning with adaptive and personalized learning solutions; and (iv) adopt digital job-matching systems in higher education and technical and vocational education and training (TVET). To realize these ambitions, ADB needs to ensure that it has adequate resources, relevant expertise, and organizational structure in place.

### **2. ADB's education portfolio is small and diverse**

13. ADB has been active in the education sector since 1970. To date, it has provided 270 projects amounting to \$18.5 billion in loans and grants, which represents almost 5% of total support provided over the period (Figure 3). The share of education sector support as part of ADB's total portfolio remains below ADB's target. In its latest policy document, the 2022 Education [Sector Directional Guide](#), ADB aims to expand its education operations further to meet the corporate results framework (CRF) target of 6–10% of total portfolio.<sup>14</sup> ADB has had this target for more than a decade; the target has rarely been met, despite significant increases in the number of projects and monetary value of ADB's education portfolio since 2010.<sup>15</sup>

<sup>12</sup> ADB. 2002. [Education: Our Framework](#). Policies and Strategies. Manila.

<sup>13</sup> Footnote 3.

<sup>14</sup> ADB. 2019. [ADB Corporate Results Framework, 2019–2024: Policy Paper](#). Manila.

<sup>15</sup> The increase followed the publication of the 2010 Education Sector Operations Plan (ESOP), which outlined plans to scale ADB's education portfolio 4% of ADB's total portfolio by 2012 and continue increasing afterwards.

**Figure 3: Total value and share of ADB's education loans and grants, 1970-2023**

Note: Figures exclude cofinancing.

Source: Asian Development Bank. Education Dashboard (accessed 24 January 2024).

14. ADB is active in all education subsectors. ADB's education portfolio since 1970 consists of support to TVET (30%), pre-primary and primary education (28%), secondary education (17%), education sector development (14%) tertiary education (10%), and non-formal education (1%). Until 2000, support for primary and pre-primary education took up the largest share of ADB's education portfolio. While ADB has maintained a strong presence in basic and secondary education, it has significantly increased its support for TVET and education sector development since 2011 (Figure 4).

**Figure 4: ADB support to education by subsector, 1970-2023 (inflation adjusted to 2023 prices, \$ million)**

Source: Asian Development Bank. Education Dashboard (accessed 24 January 2024).

15. Supporting all education subsectors adds complexity to ADB's approach. Each education subsectors have different target population (from infants to young adults), objectives (e.g., socialization, foundational skills, specific skills, advanced training), as well as governance and authorities. Consequently, ADB has to spread, even stretch, its limited resources for education support. The evaluation notes that ADB's approach is no different from other development partners banks in spreading or stretching its limited support for education. The rationale for ADB support for education in any given country—as discussed further below with reference to the Theory of Change for this evaluation—will necessarily have to be calibrated and designed with reference to its vision for its support to the sector as well the institution's overarching objective to reduce poverty.

16. ADB projects are concentrated in South and Southeast Asia (Figure 5), which makes up 78% of ADB's education portfolio. ADB has used a range of modalities to support the education sector. During the evaluation period, 51% of the operations in the education portfolio are investment projects. Policy-based loans and grants, which support education sector policy reforms and governance, make up 14% of the overall education portfolio (Figure 6). Of particular note is the education sector's utilization of results-based lending (RBLs) which make 35% of education portfolio. RBLs have been mainly used in the education sector; of 40 RBL ADB has provided since 2013, 17 are education projects.

### 3. Evaluations Show ADB's Education Portfolio is Largely Successful

17. The education sector has the highest project success rate and highest success rate across all sectors. Between 2011 to 2023, 59 education projects have closed, of which 39 had project completion reports; IED validated 27 of them. Since 2011, the independent evaluations of education operations found that the 3-year success rate of education projects appears to have a recurring 4-year cycle, increasing from 41% in 2011–2013 to 100% in 2014–2016 and then declining to 55% in 2017–2019, and again reaching 100% in 2020–2022. (Figure 7). From 2018 to 2023, the performance of the education sector has consistently surpassed ADB's success rate across all sectors.

#### 4. Comparative Perspective with Other Development Partners

18. Many development partners are actively providing support to the education sector in DMCs. ADB has several projects delivered in cooperation with other development banks (Asian Infrastructure Investment Bank and the World Bank), multilateral agencies (European Union, UNICEF), and bilateral governments (Australia, Canada, Denmark, Finland, France, Germany, Ireland, Japan, Korea, New Zealand, Norway, the People's Republic of China [PRC], Sweden, Switzerland, and the United States of America). More recently, international nongovernment organizations and private sector initiatives have emerged to become more active players with growing importance.

#### C. Evaluation Purpose and Scope, Theory of Change, and Key Questions

19. **Purpose and objective.** The evaluation aims to assess ADB's contribution to education as a tool for poverty reduction and promoting inclusive growth. Given the importance of education and learning objectives to achieving ADB's Strategy 2030 goals, the evaluation will focus on identifying lessons, good practices, and recommendations to better guide ADB's work on the education sector moving forward. Based on its findings, this evaluation will provide a set of lessons learned and recommendation for ADB to strengthen its strategy and operations in education.

20. **Scope.** The evaluation will include ADB sovereign and nonsovereign loans, grants, and technical assistance (TA) in the education sector approved from 2011 to 2023 (inclusive). During this period, ADB saw a significant increase in the volume of its education portfolio, following the plan stipulated in the 2010 Education Sector Operational Plan (para. 14). In this period, ADB approved 127 projects totaling \$11.6 billion (Table 1) with education listed as one of the sectors. The portfolio can be broken down into two groups: projects in which education is listed as the main sector ('core' education support), and those projects approved under different sectors that have education components.<sup>16</sup> Of the 127 projects, 92 (\$10.2 billion) are core education projects, and 35 (\$1.4 billion) are non-core. That means on average ADB approves seven core education projects per year.

21. In the same period, ADB also approved 224 TA projects with a value of \$131.3 million. About two-thirds (63%) of the TAs provide transaction-related support at the country level while 37% of the TAs supported policy advisory, research and development, and knowledge support. Of the 224 TA projects, 90 are at the regional level worth \$41.7 million. The private sector share of operations in the education sector remains small, consisting of equities, direct investments, and investment funds totaling \$24.3 million. Appendix 1 provides a list of ADB education projects.

---

<sup>16</sup> Examples of non-core education projects are social protection support that had education components; emergency assistance or disaster relief programs which provided support for school reconstructions; business climate improvement supports that provided trainings for job seekers; or investment projects that provided trainings for specific works in the particular sector.

**Table 1: ADB's Loans, Grants, and Technical Assistance in Education, 2011–2023**

|   | No. of projects | Approval amount (\$ million) | Cofinancing amount (\$ million) | Total amount (\$ million) |
|---|-----------------|------------------------------|---------------------------------|---------------------------|
| <b>Sovereign</b>  |                 |                              |                                 |                           |
| <b>Investment projects (loans and grants)<sup>a</sup></b> | <b>127</b>      | <b>11,571.9</b>              | <b>6,504.1</b>                  | <b>18,076.0</b>           |
| - Core education  | 92              | 10,221.7                     |                                 |                           |
| - Non-core education                                      | 35              | 1,350.2                      |                                 |                           |
| <b>Technical assistance<sup>b</sup></b>                   | <b>221</b>      | <b>130.5</b>                 | <b>168.4</b>                    | <b>298.9</b>              |
| - Core education  | 133             | 111.4                        |                                 |                           |
| - Non-core education                                      | 88              | 19.1                         |                                 |                           |
| <b>Subtotal</b>   | <b>348</b>      | <b>11,702.4</b>              | <b>6,672.5</b>                  | <b>18,374.9</b>           |
| <b>Nonsovereign</b>                                       |                 |                              |                                 |                           |
| Investment projects (equity and loans)                    | 5               | 24.3                         | -                               | 24.3                      |
| Technical assistance                                      | 3               | 0.8                          | -                               | 0.8                       |
| <b>Subtotal</b>   | <b>8</b>        | <b>25.1</b>                  | <b>-</b>                        | <b>25.1</b>               |
| <b>Total</b>  | <b>356</b>      | <b>11,727.5</b>              | <b>6,672.5</b>                  | <b>18,400.0</b>           |

ADB = Asian Development Bank.

<sup>a</sup> Includes loans and grants that tagged education as primary sector as well other sectors with education as subsectors. Additional financing projects/technical assistance (TA) are not counted separately from its original project/TAs.

<sup>b</sup> Includes stand-alone and piggybacked technical assistance, and regional TAs.

<sup>c</sup> Cofinancing includes those that are fully, partially, and not administered by ADB.

Source: Independent Evaluation Department estimates.

22. **Theory of Change.** The evaluation team develops a Theory of Change (TOC) to capture how ADB plans and allocates its support for education. This TOC, which is included in Appendix 2, is used to model the process used to develop and implement ADB's support for the education sector. The TOC reflects an analysis of ADB education policy and strategy as well as high-level interviews and meetings engaged in by the evaluation team with Board members and the ADB's Education Sector Group (EDU-SG). In the TOC, ADB seeks to contribute to its high-level objectives, by providing support to the education sector. The high-level objectives are determined by ADB's corporate strategy, and the more specific objectives are outlined in its country strategy. Following its policies on education, ADB seeks to contribute to corporate objectives focusing on the following outcomes: (i) quality learning for all (including gender, disability, ethnic minorities, displaced persons, etc.); and (ii) enhanced employability of all graduates (from all levels of education) of education systems in the region.

23. To achieve these objectives, ADB recognizes the need for a longer term (typically around 10 years) "framework" to support engagement at country level. A framework outlines ADB's country level approach towards education, setting out priorities and weighing options. This can be a formal document, or it can implicit strategic approach. These frameworks would be based on a comprehensive analysis of need in context at all levels of DMC education systems. Frameworks would also be informed by extensive stakeholder consultation (ministry of education, ministry of finance, other ministries, development partners, community and civil society organizations, and the private sector) to ensure relevance and buy-in.

24. Country programs would be informed by the conclusions and recommendations of the frameworks that would, in turn, help support strategic selectivity (what interventions, in what sub-sector, etc.) towards contributing to the two desired outcomes (quality learning for all; enhanced employability of all graduates). Frameworks would also help determine how best ADB can deliver necessary support through its financing (multiple modalities as relevant), expertise, knowledge, convening, and TA.

25. **Evaluation questions.** The evaluation's overarching question is ***"How well-positioned is ADB to deliver education support contributing to 'learning for all' and graduate employability in Asia and the Pacific?"*** In support of this overarching question, the following evaluation sub-questions (ESQ) are proposed:

- (i) *ESQ1.* To what extent is ADB support for education relevant to the needs and challenges of the DMCs?
- (ii) *ESQ2.* To what extent have ADB operations been effective in contributing to the key outcomes of learning for all and graduate employability in Asia and the Pacific?
- (iii) *ESQ3.* To what extent does ADB have adequate resources, processes, and organizational structure to deliver its goals in the education sector?
- (iv) *ESQ4.* How coherent is ADB support for education at the country level, bringing together financial support, technical assistance, and policy dialogue?

#### **D. Evaluation Method**

26. The evaluation will adopt a mixed-methods approach that triangulates qualitative and quantitative data from various sources to test its TOC and answer the evaluation questions. This section presents a summary of the evaluation's methodology, divided into four key activities. A detailed explanation of the methods is presented in Appendix 3.

27. **Document and data analysis.** The activities will involve: (i) an analysis of ADB strategies, including the education policy and strategy and country partnership strategies; (ii) secondary data analysis (e.g., on learning outcomes, the learning crisis, and learning loss); and (iii) review of literature (academic papers, reports published by think-tanks or other development organizations, etc.) on best practices in ensuring inclusive and quality education provision. The results of the document and data analysis will contribute towards developing the overall background and context of the evaluation and inform the subsequent activities.

28. **Portfolio review.** The evaluation will perform an in-depth analysis of ADB's sovereign and nonsovereign portfolio in education from 2011–2023. The portfolio review intends to provide an insight on the focus, performance, key innovation, as well as the ambition of ADB education operations. The review will involve: (i) statistical analysis of ADB education portfolio by key activities, region and country, subsector, interaction with other sectors, lending instruments, and other parameters; and (ii) review of project documents to assess the project design and monitoring frameworks, objectives, targets, and performances.

29. **Assessment of ADB's internal resources.** The evaluation will assess whether ADB's internal resources—particularly the organizational structure and education sector expertise—is set up for effective delivery of support. Specific emphasis will be given to technical and organizational capacity to introduce, replicate, and mainstream innovations and new initiatives on education support within the ADB portfolio per Strategy 2030 objectives.

30. **Interviews.** To complement and triangulate the findings from the desk work, portfolio review, and institutional assessment, the evaluation team will undertake semi-structured interviews with key informants. The education specialists at the knowledge and operation departments, as well as specialists in other related sectors, will be key ADB informants. External informants include education experts and specialists from other development partners.

31. **Country case assessments.** To assess how ADB tailors its education support to different contexts, the evaluation will conduct a “deep dive” analysis on countries that are purposively chosen to capture the diversity of ADB’s support with reference to various criteria to include the range of education interventions across sub-systems (i.e., pre-primary to tertiary), the interactions between projects in education and other sectors, as well the level of learning poverty in respective countries (see Appendix 3 for details). Case studies will be used to illustrate aspects of ADB support such as (i) the extent to which country programs and portfolio are informed by frameworks or other research; (ii) the nature of the relationship between ADB and respective governments; and (iii) the range and depth of collaboration with development partners and other stakeholders.

32. Based on the approach detailed in Appendix 3, four countries have been selected: Cambodia, India, Nepal, and the Philippines. The combined portfolio of the four countries consists of 31 sovereign loans and grants project—14 active and 17 closed—amounting to \$3.5 billion (30% of ADB’s total education portfolio), and 31 TA projects of \$29.5 million. Field missions will be conducted in Cambodia, Nepal, and the Philippines, while case assessments in India will be conducted through virtual interviews and document analysis.<sup>17</sup>

33. **Horizontal assessments and review of selected projects.** In addition to education projects and TA included in the country case assessments, the evaluation will assess ADB’s support for specific themes, subsectors, and types of modalities. The particular areas will be determined during the evaluation but are likely to include (1) school to work transition, (2) improving learning, (3) the utilization of innovative technology, and (4) post-COVID recovery. An additional set of reviews will focus on specific modalities, such as result-based and policy-based operations. For each theme, the evaluation will conduct detailed review of selected projects. This will involve research of relevant documents (reports and recommendations of the president, project completion reports, project validation and performance evaluation reports, and TA reports including their completion reports) to identify common elements across projects. To complement the review of projects, the evaluation will carry out selective interviews of ADB staff and DMC officials. In some cases, this will be part of the field missions and in other cases, it will be held virtually.

34. **Using the findings to answer the evaluation questions.** Table 2 presents a summary of the evaluation’s methodological approach and the methods that will be used to answer each evaluation sub-question.

---

<sup>17</sup> In Nepal and the Philippines, interviews with key informants and project site visits will be conducted jointly with IED’s gender evaluation mission.

**Table 2: Summary of the Evaluation Methods and Subquestions**

|  | <b>Overarching question: <i>How well-positioned is ADB to deliver education support contributing to 'learning for all' and graduate employability in Asia and the Pacific?</i></b> |   |   |   |
|--|--|---|---|---|
|  | <b>ESQ 1. To what extent is ADB support for education relevant to the needs and challenges of the DMCs?</b>  | <b>ESQ 2. To what extent have ADB operations been effective in contributing to the key outcomes of learning for all and graduate employability in Asia and the Pacific?</b> | <b>ESQ 3. To what extent does ADB have adequate resources, processes, and structure to deliver its goals in the education sector?</b> | <b>ESQ 4. How coherent is ADB support for education at the country level, bringing together financial support, technical assistance, and policy dialogue?</b> |
| Secondary data analysis                                | ●  | ●   |   |   |
| Literature review                                      | ●  |   |   |   |
| Document review  | ●  |   | ●   | ●   |

ESQ = evaluation sub-question, FGD = focused group discussion.  
Source: Independent Evaluation Department.

## **E. Limitations**

35. **Data quality and availability.** Low quality or limited availability of data in some countries may limit the specificity and precision of the analysis, particularly with reference to learning outcomes. To mitigate, the evaluation team will: (i) utilize the knowledge and experience of local consultants in facilitating data collection and identifying key stakeholders outside of the government; (ii) work closely with, and leveraging the support of the EDU-SG; (iii) engage as many relevant stakeholders as possible to ensure as broad a perspective as possible; and (iv) use existing (secondary) data sets to ensure robust coverage of any quantitative data available.

## **F. Resource Requirements and Tentative Timetable**

36. **Resource requirements.** The evaluation will be conducted by a team of IED staff comprising Erik Bloom and Ari Perdana, team leaders, with the overall responsibility for the evaluation implementation and report delivery; with support from Glennie Castillo and Michael Diza, national officers. The evaluation team will hire consultants to provide support.

37. **Peer reviewers.** The evaluation will engage two external reviewers and an IED staff to provide comments on the draft report. The external reviewers will be international experts in education policy and practice with knowledge on multilateral development banks' operations.

38. **Tentative timetable.** The milestones for the evaluation are:

| <b>Activity/Milestone</b>                 | <b>Target Date</b>      |
|---|-------------------------|
| Approval of the evaluation approach paper | I March 2024            |
| Country visits                            | I–IV April 2024         |
| Storyline draft                           | IV July 2024            |
| Draft report for interdepartmental review | III Sept–I October 2024 |
| Heads of departments meeting              | IV October 2024         |
| IED Approval                              | II November 2024        |
| DEC Meeting                               | I December 2024         |

## G. Engagement and Dissemination

39. The evaluation team will continue to pursue close engagement with the EDU-SG and other key stakeholders throughout the evaluation process. While maintaining an independent and objective stance, IED will meet senior management and key staff in EDU-SG to ensure this evaluation's relevance and utility. Collaboration with EDU-SG will support the selection of case studies and the identification of key informants, government representatives, civil society organizations (CSO), and main stakeholders, and it will provide an opportunity to exchange data and information. Finally, the evaluation team anticipates interest from external stakeholders—in particular, ministries of education, CSOs, other development partners, academics, and other researchers—because the evaluation will provide insights into system-level issues that need to be addressed to improve learning outcomes.

40. The evaluation's main output will be a report that presents relevant findings and lessons. IED will design an evaluation outreach strategy for both internal and external audiences. In addition to the final report, the team will develop an outreach plan in collaboration with the IED communications team. The envisioned dissemination activities are knowledge sharing and learning activities, publishing of learning and communication materials, external seminars, conferences, and presentation within ADB including, as a possibility, during the ADB Annual Meeting in May 2025 (Appendix 4). The final report will be made available on IED's website and other electronic platforms.

41. **Collaboration with other ongoing evaluations.** To optimize the use of resources and avoid coordination challenges, the evaluation will collaborate with other ongoing IED evaluations. In particular, the evaluation will work closely with the evaluation of ADB's Support for Accelerating Progress in Gender Equality, which has an overlapping timeline, including a joint evaluation mission to Nepal and the Philippines.

### List of Appendixes

1. List of Loans, Grants, and Technical Assistance for Education Sector, 2011-2023
2. Theory of Change
3. Evaluation Methodology
4. Evaluation Communication Plan
5. Cost Estimate (*available on request*)
6. Terms of References (*available on request*)

## APPENDIX 2. Theory of Change

Source: Independent Evaluation Department.

### APPENDIX 3. Evaluation Methods

1. The evaluation will adopt a mixed-methods approach that triangulates qualitative and quantitative data collected from various sources with reference to the evaluation questions and its theory of change. This appendix presents a more detailed explanation of the methods that the evaluation will conduct.
2. **Secondary data analysis.** The evaluation will start with a broader context and background on learning outcomes in the region. To do that, the evaluation team will conduct analyses of secondary data which are available publicly (such as UNESCO Institute for Statistics, World Inequality Database on Education, Service Delivery Indicators Database, World Development Indicators, and EdStats). The analysis will focus on indicators on input (education spending, access, and quality), achievements (enrollment, transition, completion, and dropout), and performance (test scores, employability, and other labor market outcomes).
3. **Structured literature reviews.** The evaluation will review existing literature (academic papers and reports produced by development partners, governments, think tanks, etc.). The focus will be on: (i) the latest evidence, best practices, and other important contextual material in the pursuit of education quality and enhanced learning outcomes; (ii) the role of coronavirus disease (COVID-19) in exacerbating an already challenging situation (for example, with reference to learning loss, mitigation strategies, long-term impacts, etc.) not only in already vulnerable countries but also in countries that may have been performing relatively well before the pandemic; (iii) the extent, role and contributions of private education in Asia and the Pacific; and (iv) evaluation reports published by IED and other international organizations identifying lessons learned.
4. **Document review.** The evaluation will conduct a review of ADB strategic documents relevant to the education sector. The evaluation will specifically assess strategy at the corporate and country level. This will include reviewing ADB education sector policy and strategy, country partnership strategy, sector assessments, knowledge products, and other relevant materials, to learn how and ADB has supported the achievement of education quality and learning outcomes. A structured review of country partnership strategies (CPSs) and sector strategies will be undertaken to breadth and depth of diagnostics and direction for the sector at the country level.
5. **Review of internal resources.** The evaluation will assess whether ADB's organizational structure and education sector expertise in the Climate Change and Sustainable Department (CCSD), Sector and Thematic Group (STG), the education focal persons in the regional departments, the Procurement, Portfolio and Financial Management Department (PPFD), resident missions, and Private Sector Operations Department (PSOD), as well as in the other identified education resources, are set up for delivery. Specific emphasis will be given to technical and organizational capacity to introduce, replicate and mainstream innovations and new initiatives on education support within the ADB portfolio as per the Strategy 2030 objectives. The evaluation will also look at how the New Operating Model (NOM) will change and potentially improve ADB's operation in education.
6. **Portfolio review.** The evaluation will analyze ADB's sovereign and nonsovereign portfolio in education from 2011–2023, looking at the trend by key activities, region and country, subsector, interaction with other sectors, lending instruments, and other parameters. Depending on the availability of data, the evaluation may undertake statistical analysis to examine the determinants of project performance. The evaluation will also review technical assistance (TA) projects in terms of policy, capacity, innovation, and how they support partnerships, knowledge exchange, and regional cooperation.

7. As of 2023, ADB had 45 active core education operations, while 42 have closed. Of the 42 closed operations, IED has validated 18. The evaluation will review each ADB operation, primarily through a document review to understand the nature of ADB's focus on education across subsectors, developing member countries (DMCs), and other classification. IED will develop protocols to review project and evaluation, and in some cases, interviews with ADB and DMC staff. These protocols will include:

- **Financing modalities, inputs and activities supported by ADB operations**, to understand the scope and focus of ADB funding.
- **Review of policy dialogue, partnerships, and technical assistance**, based on back-to-office reports, to understand the extent of ADB's support for knowledge solutions and its convening power in the education sector.
- **Review of design and monitoring frameworks and project objectives**, to examine the extent and ambition of ADB's targets and objectives.

8. **Historic analysis of ADB portfolio.** ADB has been active in education since the early 1970s. Using historical portfolio data, the evaluation will trace the evolution of ADB's support, mapping changes in DMC and subsector coverage. Except in special circumstances, the evaluation is not likely to go into the details of projects approved before 2011.

9. **Country case assessments.** To assess how ADB tailors its education support, the evaluation will conduct a "deep dive" analysis of ADB's support at the country level in four DMCs. The purpose of these country case studies is to understand ADB's strategic focus and how it organizes its country program for education. The expected takeaways from country case assessments will inform the evaluation on: (i) the country's key education achievements and challenges; (ii) how ADB develops its country-level strategic plans; (iii) how ADB delivers its support on support; and (iv) how ADB works with the government, other development partners, and other stakeholders the countries. The country case assessments will consist of: (i) secondary data analysis focusing on labor and education; (ii) document and literature review of the government development plans and strategies, ADB CPS, portfolio analysis, project documents, and other relevant literature from the selected countries; and (iii) interviews to obtain perspectives from the government, ADB resident mission staff, project implementation team, development partners, beneficiary, and other stakeholders in the countries.

10. As ADB focuses its support in education in a small group of DMCs, the selection of DMCs for country case assessments is not intended to be a representative sample of the overall ADB portfolio. Rather, the selection aims to capture the diversity of ADB's support, considering both the economic conditions (ADB's country classification and income level) and the type of ADB education interventions (the modality, range of education subsectors, partnership with other development partners, and the interactions between projects in education and other sectors). Based on those criteria, the evaluation will conduct case studies in Cambodia, India, Nepal, and the Philippines for the assessments (Table A3 explains specific background on country selection). Their combined portfolio consists of 31 sovereign loans and grants projects—14 active and 17 closed—amounting to \$3.5 billion (30% of ADB's total education portfolio), and 31 TA projects of \$29.5 million. Field missions will be conducted in Cambodia, Nepal, and the Philippines. In Nepal and the Philippines, interviews with key informants and project site visits will be conducted jointly with IED's gender evaluation mission. The case assessments in India will be conducted through virtual interviews and document analysis. While the choice of cases studies was made to ensure diversity, the choice of field visits is largely driven by logistical concerns.

11. **Horizontal assessments and review of selected projects.** The evaluation will assess ADB's support for specific themes, subsectors, and types of modalities. The particular areas will be determined during the evaluation but are likely to include (i) school to work transition, (ii) improving learning, (iii) the utilization of innovative technology, and (iv) post-COVID recovery. An additional set of reviews will focus on specific modalities, such as result-based and policy-based operations.

12. To understand ADB's support for different themes, the evaluation will carry out detailed review of selected projects. The evaluation will carry out systematic review to understand ADB's approach and to identify common elements. To complement the review of projects, the evaluation will carry out selective interviews of ADB staff and DMC officials. In some cases, this will be part of the field missions and in other cases, it will be held virtually. The results of portfolio and document reviews, as well as input from ADB management, will inform the selection of projects to be reviewed.

13. **Interviews with key informants.** To complement and triangulate findings from the above evaluation methods, the evaluation team will undertake semi-structured interviews with key informants (national stakeholders, ADB staff, and key development partners). Within ADB, education specialists in the knowledge and operations department will be key informants. Global experts and other development partners' staff will also be interviewed.

**Table A3: Selection of Country Case Assessments (2011–2023)**

| Country     | Group | Education index | Number of projects (\$ million)                              |               | No. of projects by modality          | No. of projects by subsectors                          | % education portfolio to ADB total education portfolio | % education portfolio to ADB's total country portfolio | Remarks  |
|-------------|-------|-----------------|--|---------------|--------------------------------------|--|--|--|--|
|             |       |                 | Loan/grants  | TA            |                                      |  |  |  |  |
| Cambodia    | A     | 0.355           | 8<br>(\$325.9)<br><br>3 active,<br>5 closed                  | 5<br>(\$4.4)  | Investment = 5<br>PBL = 3<br>RBL = 0 | ESD = 3<br>Secondary = 2<br>TVET = 3                   | 3.3  | 12.0   | ADB has been active in Cambodia for more than 2 decades and has worked closely with other development partners. ADB has been mainly supporting the country's education sector development using the sector development program modality. Much of ADB's support was at a time when the country was classified as FCAS.  |
| India       | C     | 0.348           | 7<br>(\$746.9)<br><br>4 active,<br>2 closed,<br>1 terminated | 12<br>(\$9.3) | Investment = 5<br>RBL = 2            | Secondary = 1<br>TVET = 4<br>Basic = 1<br>Tertiary = 1 | 9.7  | 3.2  | Being the world's largest country in terms of population, despite the country's rapid economic growth and increasing prosperity, the education system is still facing challenges in terms of unequal access to education, outdated curricula, and inadequate funding. Over the past decade, ADB has been actively involved in various education subsectors, mainly through investment projects at different states, as well as providing a tertiary education project and two private sector projects. |
| Nepal       | A     | 0.541           | 6<br>(\$380.3)<br><br>2 active,<br>4 closed                  | 9<br>(\$8.7)  | Investment = 3<br>PBL = 1<br>RBL = 2 | ESD = 3<br>Basic = 1<br>Secondary = 1<br>TVET = 1      | 5.6  | 13.0   | ADB has been active in Nepal for more than 2 decades and has worked closely with other development partners. Nepal is in a decentralization process that will have a major impact on education. ADB support has been concentrated in the education sector development.   |
| Philippines | C     | 0.311           | 10<br>(\$2,005)<br><br>5 active,<br>5 closed                 | 5<br>(\$7.1)  | Investment = 4<br>PBL = 4<br>RBL = 2 | ESD = 2<br>Basic = 1<br>Secondary = 2<br>TVET = 5      | 17.3   | 9.0  | ADB's engagement in the education sector started in 1975. The Philippines is among the largest beneficiaries of ADB's education support. ADB has been actively involved in various education subsectors, with the emphasis on improving the skills of the workforce through senior high school reforms and TVET supports.  |

ADB = Asian Development Bank, DMC = developing member country, ESD = education sector development, FCAS = fragile and conflict-affected situation, PBL = policy-based lending, RBL = results-based lending, TA = technical assistance, TVET = technical and vocational education and training.

### APPENDIX 4. Evaluation Communication Plan

**Evaluation Context and Objectives:** The evaluation aims to assess ADB's contribution to education as a tool for poverty reduction and promoting inclusive growth. The objective of this evaluation is to assess how well positioned ADB is in responding to the rapidly evolving education challenges in Asia and the Pacific. The evaluation will include ADB sovereign and nonsovereign loans, grants, and technical assistance (TA) in the education sector approved from 2011 to 2023.

**Communications Goal:** To disseminate the findings of the evaluation to internal and external stakeholders.

| Communications Goal: To disseminate the findings of the evaluation to internal and external stakeholders. |  |   |  |   |  |
|---|--|---|--|---|--|
| Audience  | Messages   | Activity & Tools  | Timeline   | Comms Resources   | Expected Outcomes  |
